AGENTAUDIT · READINESS AUDIT

**Graza**

graza.co · GMV band n/a (readiness-only) · 2026-06-13

93 / 100

DISCOVERY READINESS SCORE

AGENT ACCESS (ROBOTS.TXT)		10/10
STRUCTURED DATA (JSON-LD)		12/15
PRODUCT FEEDS (PRODUCTS.JSON, SITEMAP)		10/10
LLMS.TXT		5/5

Readiness-only audit: discovery (public-surface) signals. The transaction layer (cart, checkout, live agents) was not tested.

EXECUTIVE SUMMARY

NOTE All 13 agent user-agents are allowed by robots.txt.

MEDIUM 6 of 6 sampled product pages have incomplete Product/Offer fields (product missing sku/gtin; missing og:title).

HOW YOU COMPARE

Your discovery-readiness score of **93/100** — the public-surface signals every store exposes (robots, structured data, feeds, llms.txt) — places you in the **top 38%** of a cohort of 50 stores (median 85.5). 19 score higher.

Cohort: Top 50 Shopify-powered stores, June 2026. These are large, well-known stores, so a low rank here is a conservative read — the typical store scores lower. Discovery (public-surface) only; transaction-layer and dispute benchmarks are not cohort-derived.

CAN EACH AGENT BUY FROM YOU?

AGENT		DISCOVER	READ PRODUCT	REACH CART	REACH CHECKOUT	LIVE OUTCOME
ChatGPT (OpenAI)	INFERRED	yes	yes	—	—	not live-tested
Perplexity	INFERRED	yes	yes	—	—	not live-tested
Claude (Anthropic)		yes	yes	yes	yes	completed
Google (Gemini/AI)	INFERRED	yes	yes	—	—	not live-tested
Amazon (Rufus)	INFERRED	yes	yes	—	—	not live-tested
Apple Intelligence	INFERRED	yes	yes	—	—	not live-tested
Meta AI	INFERRED	yes	yes	—	—	not live-tested

Rows tagged `INFERRED` were not live-tested (only ChatGPT, Perplexity and Claude are run as live purchases today). Their cart/checkout cells are inferred from robots access and the shared automated probe, not a per-agent purchase attempt. "Discover" = allowed by robots.txt; "Read product" = required structured-data fields present.

DISCOVERY LAYER

13/13 agent user-agents allowed by robots.txt.

FEED	STATUS	NOTES
<code>products.json</code>	pass	products.json accessible
<code>sitemap.xml</code>	pass	sitemap ok, 10 product urls sampled
<code>llms.txt</code>	pass	llms.txt present

PRODUCT PAGE	JSON-LD FIELDS	PROBLEMS
<code>/products/sizzle</code>	4/5	product missing sku/gtin; missing og:title
<code>/products/drizzle</code>	4/5	product missing sku/gtin; missing og:title
<code>/products/sizzle-drizzle-combo-pack</code>	4/5	product missing sku/gtin; missing og:title
<code>/products/drizzle-5l-case-of-3</code>	4/5	product missing sku/gtin; missing og:title
<code>/products/sizzle-5l-case-of-3</code>	4/5	product missing sku/gtin; missing og:title
<code>/products/gift-set-drizzle-sizzle</code>	4/5	product missing sku/gtin; missing og:title

TRANSACTION LAYER

AGENT	STAGE REACHED	BLOCKER / NOTES
Claude	completed (stopped pre-payment)	Live assisted browser session driven via Claude in Chrome on 2026-06-13 (a real agent-style run, not the consumer Claude shopping feature). Completed the entire flow up to the payment step: cart -> contact -> shipping address -> shipping method (\$9.00 Standard) -> credit-card payment screen, stopping immediately before "Pay now". Two findings for the readout: (1) there is NO CAPTCHA on the product/checkout path — the automated readiness probe's captcha flag was a false positive from a site-wide reCAPTCHA script used for forms; (2) the only real friction was an SMS/email popup interstitial whose close control was hard to reach — a likely drop-off point for less-persistent agents.
codex	completed (stopped pre-payment)	Added Sizzle to cart, entered contact and shipping details, reached the payment section with card fields visible, and did not enter payment details.

WHERE AGENTS DROP OFF

The largest cluster of failures is at **Product page (read details)** — fix #1 below targets this stage.

Product page (read details)		6
Product page (read details): 6 product pages with structured-data gaps		

FIX LIST

#	FIX (RANKED BY IMPACT ÷ EFFORT)	IMPACT	EFFORT
1	Server-render complete JSON-LD Product/Offer fields Price, currency, availability and identifiers are what agents quote before visiting — and they must be in the initial HTML, since most crawler-class agents don't run JavaScript.	4/5	2/5
2	Add canonical and OpenGraph tags to product pages Cheap wins for deduplication and previews in assistant answers.	2/5	1/5
3	Unblock the add-to-cart → checkout path The automated probe could not reach checkout; every agent purchase fails at this wall.	5/5	3/5

COPY-PASTE FIXES

JSON-LD PRODUCT/OFFER — FILL THE FIELDS AGENTS QUOTE

Serve this in the initial HTML (server-rendered), not injected by JavaScript — most crawler-class agents don't run JS. Affected pages: /products/sizzle, /products/drizzle, /products/sizzle-drizzle-combo-pack, /products/drizzle-5l-case-of-3, /products/sizzle-5l-case-of-3, /products/gift-set-drizzle-sizzle.

METHODOLOGY & CAVEATS

- This is a **readiness-only** audit: it measures the public storefront (robots, feeds, structured data, checkout reachability). Order classification and dispute exposure require the merchant's order data and are not included here.
- Discovery checks read the **initial HTML response** and do not execute JavaScript. Structured data injected client-side will read as missing here — which is also how agents that don't run JS (most crawler-class agents) see the page.
- Per-agent reachability is inferred from robots access and one shared automated probe except for ChatGPT/Perplexity/Claude, which are run as live purchases. Inferred rows are labeled.
- Automated checks stop at the checkout information page; no purchase is ever completed and no payment fields are entered. CAPTCHA presence is recorded, never solved or bypassed.
