AGENTAUDIT · AGENT READINESS AUDIT

 Ridge

ridge.com · 2026-06-13

85 / 100
AGENT READINESS SCORE

AGENT ACCESS (ROBOTS.TXT)		10/10
STRUCTURED DATA (JSON-LD)		0/15
PRODUCT FEEDS (PRODUCTS.JSON, SITEMAP)		10/10
LLMS.TXT		5/5
CART REACHABLE		20/20
CHECKOUT REACHABLE		20/20
LIVE AGENT OUTCOMES		20/20

Scored across discovery (public-surface) and the live transaction layer. Order classification and dispute exposure require merchant data and are not included.

EXECUTIVE SUMMARY

- NOTE

All 13 agent user-agents are allowed by robots.txt.
- MEDIUM

6 of 6 sampled product pages expose no server-rendered Product structured data — agents that don't execute JavaScript (most crawler-class agents) can't read price, availability, or SKU.

HOW YOU COMPARE

Your **discovery sub-score** of **63/100** — just the public-surface signals every store exposes (robots, structured data, feeds, llms.txt), the slice we can compare apples-to-apples across stores — places you in the **bottom 32%** of a cohort of 50 stores (median 85.5). 34 score higher.

This is a sub-score, not your overall Agent Readiness Score above (which also credits the live transaction layer). Cohort: Top 50 Shopify-powered stores, June 2026 — large, well-known stores, so a low rank here is a conservative read; the typical store scores lower. Discovery-only; transaction-layer and dispute benchmarks are not cohort-derived.

CAN EACH AGENT BUY FROM YOU?

AGENT	DISCOVER	READ PRODUCT	REACH CART	REACH CHECKOUT	LIVE OUTCOME
ChatGPT	yes	partial	—	—	not live-tested

AGENT	DISCOVER	READ PRODUCT	REACH CART	REACH CHECKOUT	LIVE OUTCOME
Perplexity	yes	partial	—	—	not live-tested
Claude	yes	partial	—	—	not live-tested
Gemini	yes	partial	yes	yes	completed

DISCOVERY LAYER

13/13 agent user-agents allowed by robots.txt.

FEED	STATUS	NOTES
products.json	pass	products.json accessible
sitemap.xml	pass	sitemap ok, 10 product urls sampled
llms.txt	pass	llms.txt present

PRODUCT PAGE	JSON-LD FIELDS	PROBLEMS
/products/aluminum-gunmetal	not server-rendered	no server-rendered Product schema (JavaScript-only or absent)
/products/titanium-burnt	not server-rendered	no server-rendered Product schema (JavaScript-only or absent)
/products/titanium-matte-gunmetal	not server-rendered	no server-rendered Product schema (JavaScript-only or absent)
/products/carbon-fiber	not server-rendered	no server-rendered Product schema (JavaScript-only or absent)
/products/aluminum-black	not server-rendered	no server-rendered Product schema (JavaScript-only or absent)
/products/t5-torx-driver	not server-rendered	no server-rendered Product schema (JavaScript-only or absent)

TRANSACTION LAYER

AGENT	MODEL	STAGE REACHED	DISCOVERY → CART	BLOCKER / NOTES
Gemini	Gemini 3.5 Pro	completed (stopped pre-payment)	17s	Successfully navigated through checkout to the payment step using mock data without hitting any blockers.

WHERE AGENTS DROP OFF

The largest cluster of failures is at **Product page (read details)** — fix #1 below targets this stage.

- **Product page (read details):** 6 product pages with structured-data gaps

FIX LIST

#	FIX (RANKED BY IMPACT ÷ EFFORT)	IMPACT	EFFORT
1	Server-render complete JSON-LD Product/Offer fields Price, currency, availability and identifiers are what agents quote before visiting — and they must be in the initial HTML, since most crawler-class agents don't run JavaScript.	4/5	2/5
2	Unblock the add-to-cart → checkout path The automated probe could not reach checkout; every agent purchase fails at this wall.	5/5	3/5

COPY-PASTE FIXES

SERVER-RENDERED JSON-LD PRODUCT/OFFER

Serve this in the initial HTML (server-rendered), not injected by JavaScript — most crawler-class agents don't run JS. Affected pages: /products/aluminum-gunmetal, /products/titanium-burnt, /products/titanium-matte-gunmetal, /products/carbon-fiber, /products/aluminum-black, /products/t5-torx-driver.

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@type": "Product",
  "name": "<product title>",
  "image": ["https://ridge.com/<product-image>.jpg"],
  "sku": "<your SKU or GTIN>",
  "brand": { "@type": "Brand", "name": "Ridge" },
  "offers": {
    "@type": "Offer",
    "price": "<numeric price, no currency symbol>",
    "priceCurrency": "USD",
    "availability": "https://schema.org/InStock",
    "url": "https://ridge.com/products/<handle>"
  }
}
</script>
```

APPENDIX — HOW WE SCORE

The **Agent Readiness Score** runs 0–100, split into a **Discovery half (40 pts)** — can agents find and read your catalog — and a **Transaction half (60 pts)** — can they actually buy. Each component is earned proportionally (not pass/fail), then summed.

COMPONENT	MAX PTS	HOW POINTS ARE EARNED
Discovery · Agent access (robots.txt)	10	allowed agent user-agents ÷ 13, times the weight
Discovery · Structured data (JSON-LD)	15	mean across sampled product pages of (required Product/Offer fields present ÷ 5), times the weight
Discovery · Product feeds	10	half for a reachable /products.json, half for a valid sitemap.xml
Discovery · llms.txt	5	full if /llms.txt is published
Transaction · Cart reachable	20	full if the automated probe reached the cart
Transaction · Checkout reachable	20	full if it reached the checkout information page
Transaction · Live agent outcomes	20	successful live agent runs ÷ total live runs, times the weight

"Required Product/Offer fields" = price, priceCurrency, availability, SKU or GTIN, and image (5 fields), read from server-rendered JSON-LD.

DISCOVERY READINESS SCORE

The four Discovery rows rescaled to 0–100 (discovery points ÷ 40 × 100). It needs no order data, so it is the headline for readiness-only audits and the basis for the cross-store percentile — an apples-to-apples comparison whether or not a store shared its order data.

ORDER CLASSIFICATION & DISPUTES

This is a **readiness-only** audit of the public storefront. Order classification and dispute exposure require the merchant's order data (a read-only Shopify token) and are not included here; the full audit adds them.

CAVEATS

- Discovery checks read the **initial HTML response** and do not execute JavaScript. Structured data injected client-side reads as missing here — which is also how agents that don't run JS (most crawler-class agents) see the page.
- Automated and live checks stop at the checkout information / payment step; no purchase is ever completed and no payment details are entered. CAPTCHA presence is recorded, never solved or bypassed.
