DISCOVERY READINESS SCORE

Agent access (robots.txt)		10/10
Structured data (JSON-LD)		15/15
Product feeds (products.json, sitemap)		10/10
llms.txt		5/5

Readiness-only audit: discovery (public-surface) signals. The transaction layer (cart, checkout, live agents) was not tested.

EXECUTIVE SUMMARY

- All 13 agent user-agents are allowed by robots.txt.
- 2 of 5 sampled product pages have structured-data gaps (1 unparseable ld+json block(s)).

HOW YOU COMPARE

Your discovery-readiness score of **100/100** — the public-surface signals every store exposes (robots, structured data, feeds, llms.txt) — places you in the **top 1%** of a cohort of 50 stores (median 85.5). 0 score higher.

Cohort: Top 50 Shopify-powered stores, June 2026. These are large, well-known stores, so a low rank here is a conservative read — the typical store scores lower. Discovery (public-surface) only; transaction-layer and dispute benchmarks are not cohort-derived.

CAN EACH AGENT BUY FROM YOU?

AGENT	DISCOVER	READ PRODUCT	REACH CART	REACH CHECKOUT	LIVE OUTCOME
ChatGPT (OpenAI) INFERRED	yes	yes	—	—	not live-tested
Perplexity INFERRED	yes	yes	—	—	not live-tested
Claude (Anthropic) INFERRED	yes	yes	—	—	not live-tested
Google (Gemini/AI) INFERRED	yes	yes	—	—	not live-tested
Amazon (Rufus) INFERRED	yes	yes	—	—	not live-tested
Apple Intelligence INFERRED	yes	yes	—	—	not live-tested
Meta AI INFERRED	yes	yes	—	—	not live-tested
ByteDance (TikTok) INFERRED	yes	yes	—	—	not live-tested

Rows tagged INFERRED were not live-tested (only ChatGPT, Perplexity and Claude are run as live purchases today). Their cart/checkout cells are inferred from robots access and the shared automated probe, not a per-agent purchase attempt. "Discover" = allowed by robots.txt; "Read product" = required structured-data fields present.

DISCOVERY LAYER

13/13 agent user-agents allowed by robots.txt.

FEED	STATUS	NOTES
products.json	pass	products.json accessible
sitemap.xml	pass	sitemap ok, 5 product urls sampled
llms.txt	pass	llms.txt present

PRODUCT PAGE	JSON-LD FIELDS	PROBLEMS
/products/maintenance-formula-dog-food	5/5	clean
/products/performance-formula-dog-food	5/5	1 unparseable ld+json block(s)
/products/superfood-dog-treats-with-koji	5/5	clean
/products/cat-food-unicorn-pate-2	5/5	clean
/products/drain-buddy-tub-ultra-flo-2-in-1-tub-stopper-and-hair-catcher	5/5	1 unparseable ld+json block(s)

WHERE AGENTS DROP OFF

The largest cluster of failures is at **Product page (read details)** — fix #1 below targets this stage.

Product page (read details) 2

- **Product page (read details):** 2 product pages with structured-data gaps

FIX LIST

#	FIX (RANKED BY IMPACT ÷ EFFORT)	IMPACT	EFFORT
1	Unblock the add-to-cart → checkout path The automated probe could not reach checkout; every agent purchase fails at this wall.	5/5	3/5

METHODOLOGY & CAVEATS

- This is a **readiness-only** audit: it measures the public storefront (robots, feeds, structured data, checkout reachability). Order classification and dispute exposure require the merchant's order data and are not included here.
- Discovery checks read the **initial HTML response** and do not execute JavaScript. Structured data injected client-side will read as missing here — which is also how agents that don't run JS (most crawler-class agents) see the page.
- Per-agent reachability is inferred from robots access and one shared automated probe except for ChatGPT/Perplexity/Claude, which are run as live purchases. Inferred rows are labeled.
- Automated checks stop at the checkout information page; no purchase is ever completed and no payment fields are entered. CAPTCHA presence is recorded, never solved or bypassed.
