

Kettle & Fire

78 / 100

kettleandfire.com · GMV band n/a (readiness-only) · 2026-06-13

DISCOVERY READINESS SCORE

AGENT ACCESS (ROBOTS.TXT)		10/10
STRUCTURED DATA (JSON-LD)		6/15
PRODUCT FEEDS (PRODUCTS.JSON, SITEMAP)		10/10
LLMS.TXT		5/5

Readiness-only audit: discovery (public-surface) signals. The transaction layer (cart, checkout, live agents) was not tested.

EXECUTIVE SUMMARY

NOTE All 13 agent user-agents are allowed by robots.txt.

MEDIUM 8 of 8 sampled product pages have incomplete Product/Offer fields (product has no Offer; offer missing price; offer missing priceCurrency; offer missing availability).

HOW YOU COMPARE

Your discovery-readiness score of **78/100** — the public-surface signals every store exposes (robots, structured data, feeds, llms.txt) — places you in the **bottom 48%** of a cohort of 50 stores (median 85.5). 26 score higher.

Cohort: Top 50 Shopify-powered stores, June 2026. These are large, well-known stores, so a low rank here is a conservative read — the typical store scores lower. Discovery (public-surface) only; transaction-layer and dispute benchmarks are not cohort-derived.

CAN EACH AGENT BUY FROM YOU?

AGENT		DISCOVER	READ PRODUCT	REACH CART	REACH CHECKOUT	LIVE OUTCOME
ChatGPT (OpenAI)	INFERRED	yes	partial	—	—	not live-tested
Perplexity	INFERRED	yes	partial	—	—	not live-tested
Claude (Anthropic)		yes	partial	yes	yes	completed
Google (Gemini/AI)	INFERRED	yes	partial	—	—	not live-tested
Amazon (Rufus)	INFERRED	yes	partial	—	—	not live-tested
Apple Intelligence	INFERRED	yes	partial	—	—	not live-tested
Meta AI	INFERRED	yes	partial	—	—	not live-tested

Rows tagged **INFERRED** were not live-tested (only ChatGPT, Perplexity and Claude are run as live purchases today). Their cart/checkout cells are inferred from robots access and the shared automated probe, not a per-agent purchase attempt. "Discover" = allowed by robots.txt; "Read product" = required structured-data fields present.

DISCOVERY LAYER

13/13 agent user-agents allowed by robots.txt.

FEED	STATUS	NOTES
products.json	pass	products.json accessible
sitemap.xml	pass	sitemap ok, 10 product urls sampled
llms.txt	pass	llms.txt present

PRODUCT PAGE	JSON-LD FIELDS	PROBLEMS
/products/grass-fed-beef-bone-broth	2/5	product has no Offer; offer missing price; offer missing priceCurrency; offer missing availability
/products/chicken-bone-broth	2/5	product has no Offer; offer missing price; offer missing priceCurrency; offer missing availability
/products/mushroom-chicken-bone-broth	2/5	product has no Offer; offer missing price; offer missing priceCurrency; offer missing availability
/products/healthy-butternut-squash-soup	2/5	product has no Offer; offer missing price; offer missing priceCurrency; offer missing availability
/products/healthy-tomato-soup	2/5	product has no Offer; offer missing price; offer missing priceCurrency; offer missing availability
/products/keto-soup-broccoli-cheddar-16-9oz	2/5	product has no Offer; offer missing price; offer missing priceCurrency; offer missing availability
/products/keto-soup-mushroom-bisque-16-9oz	2/5	product has no Offer; offer missing price; offer missing priceCurrency; offer missing availability
/products/chipotle-beef-bone-broth	2/5	product has no Offer; offer missing price; offer missing priceCurrency; offer missing availability

TRANSACTION LAYER

AGENT	STAGE REACHED	BLOCKER / NOTES
Claude	completed (stopped pre-payment)	Live assisted browser session driven via Claude in Chrome on 2026-06-13 (a real agent-style run, not the consumer Claude shopping feature). Completed the full flow up to the payment step: cart -> contact -> shipping -> credit-card payment screen, stopping before "Pay now". No CAPTCHA on the path. Friction worth flagging on the readout: a cookie-consent dialog overlays the cart and must be dismissed before checkout — an extra hurdle for agents.

WHERE AGENTS DROP OFF

The largest cluster of failures is at **Product page (read details)** — fix #1 below targets this stage.

Product page (read details)

8

- **Product page (read details):** 8 product pages with structured-data gaps

FIX LIST

#	FIX (RANKED BY IMPACT ÷ EFFORT)	IMPACT	EFFORT
1	Server-render complete JSON-LD Product/Offer fields Price, currency, availability and identifiers are what agents quote before visiting — and they must be in the initial HTML, since most crawler-class agents don't run JavaScript.	4/5	2/5
2	Unblock the add-to-cart → checkout path The automated probe could not reach checkout; every agent purchase fails at this wall.	5/5	3/5

COPY-PASTE FIXES

JSON-LD PRODUCT/OFFER — FILL THE FIELDS AGENTS QUOTE

Serve this in the initial HTML (server-rendered), not injected by JavaScript — most crawler-class agents don't run JS. Affected pages: /products/grass-fed-beef-bone-broth, /products/chicken-bone-broth, /products/mushroom-chicken-bone-broth, /products/healthy-butternut-squash-soup, /products/healthy-tomato-soup, /products/keto-soup-broccoli-cheddar-16-9oz (+2 more).

METHODOLOGY & CAVEATS

- This is a **readiness-only** audit: it measures the public storefront (robots, feeds, structured data, checkout reachability). Order classification and dispute exposure require the merchant's order data and are not included here.
- Discovery checks read the **initial HTML response** and do not execute JavaScript. Structured data injected client-side will read as missing here — which is also how agents that don't run JS (most crawler-class agents) see the page.
- Per-agent reachability is inferred from robots access and one shared automated probe except for ChatGPT/Perplexity/Claude, which are run as live purchases. Inferred rows are labeled.
- Automated checks stop at the checkout information page; no purchase is ever completed and no payment fields are entered. CAPTCHA presence is recorded, never solved or bypassed.
