

The James Brand

thejamesbrand.com · GMV band n/a (readiness-only) · 2026-06-12

95 / 100

DISCOVERY READINESS SCORE

Agent access (robots.txt)		10/10
Structured data (JSON-LD)		13.1/15
Product feeds (products.json, sitemap)		10/10
llms.txt		5/5

Readiness-only audit: discovery (public-surface) signals. The transaction layer (cart, checkout, live agents) was not tested.

EXECUTIVE SUMMARY

- All 13 agent user-agents are allowed by robots.txt.
- 1 of 8 sampled product pages expose no server-rendered Product structured data — agents that don't execute JavaScript (most crawler-class agents) can't read price, availability, or SKU.

HOW YOU COMPARE

Your discovery-readiness score of **95/100** — the public-surface signals every store exposes (robots, structured data, feeds, llms.txt) — places you in the **top 34%** of a cohort of 50 stores (median 85.5). 17 score higher.

Cohort: Top 50 Shopify-powered stores, June 2026. These are large, well-known stores, so a low rank here is a conservative read — the typical store scores lower. Discovery (public-surface) only; transaction-layer and dispute benchmarks are not cohort-derived.

CAN EACH AGENT BUY FROM YOU?

AGENT		DISCOVER	READ PRODUCT	REACH CART	REACH CHECKOUT	LIVE OUTCOME
ChatGPT (OpenAI)	INFERRED	yes	yes	—	—	not live-tested
Perplexity	INFERRED	yes	yes	—	—	not live-tested
Claude (Anthropic)	INFERRED	yes	yes	—	—	not live-tested
Google (Gemini/AI)	INFERRED	yes	yes	—	—	not live-tested
Amazon (Rufus)	INFERRED	yes	yes	—	—	not live-tested
Apple Intelligence	INFERRED	yes	yes	—	—	not live-tested
Meta AI	INFERRED	yes	yes	—	—	not live-tested
ByteDance (TikTok)	INFERRED	yes	yes	—	—	not live-tested

Rows tagged INFERRED were not live-tested (only ChatGPT, Perplexity and Claude are run as live purchases today). Their cart/checkout cells are inferred from robots access and the shared automated probe, not a per-agent purchase attempt. "Discover" = allowed by robots.txt; "Read product" = required structured-data fields present.

DISCOVERY LAYER

13/13 agent user-agents allowed by robots.txt.

FEED	STATUS	NOTES
products.json	pass	products.json accessible
sitemap.xml	pass	sitemap ok, 10 product urls sampled
llms.txt	pass	llms.txt present

PRODUCT PAGE	JSON-LD FIELDS	PROBLEMS
/products/the-folsom	5/5	clean
/products/the-halifax	5/5	clean
/products/the-mehlville	not server-rendered	1 unparseable ld+json block(s); no server-rendered Product schema (JavaScript-only or absent)
/products/gift-card	5/5	clean
/products/the-hell-gap	5/5	clean
/products/the-holcombe	5/5	clean
/products/the-stilwell	5/5	clean
/products/the-hardin	5/5	clean

WHERE AGENTS DROP OFF

The largest cluster of failures is at **Product page (read details)** — fix #1 below targets this stage.

Product page (read details)

1

- **Product page (read details):** 1 product pages with structured-data gaps

FIX LIST

#	FIX (RANKED BY IMPACT ÷ EFFORT)	IMPACT	EFFORT
1	Server-render complete JSON-LD Product/Offer fields Price, currency, availability and identifiers are what agents quote before visiting — and they must be in the initial HTML, since most crawler-class agents don't run JavaScript.	4/5	2/5
2	Unblock the add-to-cart → checkout path The automated probe could not reach checkout; every agent purchase fails at this wall.	5/5	3/5

COPY-PASTE FIXES

JSON-LD Product/Offer — fill the fields agents quote

Serve this in the initial HTML (server-rendered), not injected by JavaScript — most crawler-class agents don't run JS. Affected pages: /products/the-mehlville.

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@type": "Product",
  "name": "<product title>",

  "sku": "<your SKU or GTIN>",
  "brand": { "@type": "Brand", "name": "The James Brand" },
  "offers": {
    "@type": "Offer",
    "price": "<numeric price, no currency symbol>",
    "priceCurrency": "USD",
    "availability": "https://schema.org/InStock",
    "url": "https://thejamesbrand.com/products/<handle>"
  }
}
</script>
```

METHODOLOGY & CAVEATS

- This is a **readiness-only** audit: it measures the public storefront (robots, feeds, structured data, checkout reachability). Order classification and dispute exposure require the merchant's order data and are not included here.
- Discovery checks read the **initial HTML response** and do not execute JavaScript. Structured data injected client-side will read as missing here — which is also how agents that don't run JS (most crawler-class agents) see the page.
- Per-agent reachability is inferred from robots access and one shared automated probe except for ChatGPT/Perplexity/Claude, which are run as live purchases. Inferred rows are labeled.
- Automated checks stop at the checkout information page; no purchase is ever completed and no payment fields are entered. CAPTCHA presence is recorded, never solved or bypassed.
