Readiness-only audit: discovery (public-surface) signals. The transaction layer (cart, checkout, live agents) was not tested.

## EXECUTIVE SUMMARY

- All 13 agent user-agents are allowed by robots.txt.
- 2 of 8 sampled product pages have incomplete Product/Offer fields (1 unparseable ld+json block(s); product missing sku/gtin).

## HOW YOU COMPARE

Your discovery-readiness score of **99/100** — the public-surface signals every store exposes (robots, structured data, feeds, llms.txt) — places you in the **top 34%** of a cohort of 50 stores (median 85.5). 17 score higher.

Cohort: Top 50 Shopify-powered stores, June 2026. These are large, well-known stores, so a low rank here is a conservative read — the typical store scores lower. Discovery (public-surface) only; transaction-layer and dispute benchmarks are not cohort-derived.

| ByteDance (TikTok) | INFERRED | yes      | yes          | —          | —              | not live-tested |

Rows tagged INFERRED were not live-tested (only ChatGPT, Perplexity and Claude are run as live purchases today). Their cart/checkout cells are inferred from robots access and the shared automated probe, not a per-agent purchase attempt. "Discover" = allowed by robots.txt; "Read product" = required structured-data fields present.

## COPY-PASTE FIXES

### JSON-LD Product/Offer — fill the fields agents quote

Serve this in the initial HTML (server-rendered), not injected by JavaScript — most crawler-class agents don't run JS. Affected pages: /products/auracle, /products/dieux-e-gift-card.

## METHODOLOGY & CAVEATS

- This is a **readiness-only** audit: it measures the public storefront (robots, feeds, structured data, checkout reachability). Order classification and dispute exposure require the merchant's order data and are not included here.
- Discovery checks read the **initial HTML response** and do not execute JavaScript. Structured data injected client-side will read as missing here — which is also how agents that don't run JS (most crawler-class agents) see the page.
- Per-agent reachability is inferred from robots access and one shared automated probe except for ChatGPT/Perplexity/Claude, which are run as live purchases. Inferred rows are labeled.
- Automated checks stop at the checkout information page; no purchase is ever completed and no payment fields are entered. CAPTCHA presence is recorded, never solved or bypassed.
