DISCOVERY READINESS SCORE

|                                        |             |       |
|----------------------------------------|-------------|-------|
| Agent access (robots.txt)              | <div></div> | 10/10 |
| Structured data (JSON-LD)              | <div></div> | 0/15  |
| Product feeds (products.json, sitemap) | <div></div> | 5/10  |
| llms.txt                               | <div></div> | 0/5   |

Readiness-only audit: discovery (public-surface) signals. The transaction layer (cart, checkout, live agents) was not tested.

## EXECUTIVE SUMMARY

- All 13 agent user-agents are allowed by robots.txt.
- The sitemap is missing or unreadable, limiting product discovery.
- No llms.txt is published — an emerging convention that guides agents through the catalog.

## HOW YOU COMPARE

Your discovery-readiness score of **38/100** — the public-surface signals every store exposes (robots, structured data, feeds, llms.txt) — places you in the **bottom 6%** of a cohort of 50 stores (median 85.5). 47 score higher.

Cohort: Top 50 Shopify-powered stores, June 2026. These are large, well-known stores, so a low rank here is a conservative read — the typical store scores lower. Discovery (public-surface) only; transaction-layer and dispute benchmarks are not cohort-derived.

CAN EACH AGENT BUY FROM YOU?

| AGENT                                    | DISCOVER | READ PRODUCT | REACH CART | REACH CHECKOUT | LIVE OUTCOME    |
|------------------------------------------|----------|--------------|------------|----------------|-----------------|
| ChatGPT (OpenAI) <span>INFERRED</span>   | yes      | —            | —          | —              | not live-tested |
| Perplexity <span>INFERRED</span>         | yes      | —            | —          | —              | not live-tested |
| Claude (Anthropic) <span>INFERRED</span> | yes      | —            | —          | —              | not live-tested |
| Google (Gemini/AI) <span>INFERRED</span> | yes      | —            | —          | —              | not live-tested |
| Amazon (Rufus) <span>INFERRED</span>     | yes      | —            | —          | —              | not live-tested |
| Apple Intelligence <span>INFERRED</span> | yes      | —            | —          | —              | not live-tested |
| Meta AI <span>INFERRED</span>            | yes      | —            | —          | —              | not live-tested |
| ByteDance (TikTok) <span>INFERRED</span> | yes      | —            | —          | —              | not live-tested |

Rows tagged INFERRED were not live-tested (only ChatGPT, Perplexity and Claude are run as live purchases today). Their cart/checkout cells are inferred from robots access and the shared automated probe, not a per-agent purchase attempt. "Discover" = allowed by robots.txt; "Read product" = required structured-data fields present.

DISCOVERY LAYER

13/13 agent user-agents allowed by robots.txt.

| FEED          | STATUS | NOTES                    |
|---------------|--------|--------------------------|
| products.json | pass   | products.json accessible |
| sitemap.xml   | fail   | sitemap.xml returned 429 |
| llms.txt      | fail   | llms.txt returned 429    |

No product pages were sampled.

WHERE AGENTS DROP OFF

No agent drop-off signals detected across discovery, cart, or checkout.

## FIX LIST

| # | FIX (RANKED BY IMPACT ÷ EFFORT)                                                                                                          | IMPACT | EFFORT |
|---|------------------------------------------------------------------------------------------------------------------------------------------|--------|--------|
| 1 | <b>Publish a product sitemap</b><br>Without a sitemap, agents sample whatever navigation exposes — usually a fraction of the catalog.    | 4/5    | 2/5    |
| 2 | <b>Publish an llms.txt index</b><br>Emerging convention; cheap to add and increasingly read by assistants.                               | 2/5    | 1/5    |
| 3 | <b>Unblock the add-to-cart → checkout path</b><br>The automated probe could not reach checkout; every agent purchase fails at this wall. | 5/5    | 3/5    |

## COPY-PASTE FIXES

### llms.txt — a guided index for AI agents

Serve this at <https://greatjonesgoods.com/llms.txt>. Emerging convention; cheap to add and increasingly read by assistants.

## METHODOLOGY & CAVEATS

- This is a **readiness-only** audit: it measures the public storefront (robots, feeds, structured data, checkout reachability). Order classification and dispute exposure require the merchant's order data and are not included here.
- Discovery checks read the **initial HTML response** and do not execute JavaScript. Structured data injected client-side will read as missing here — which is also how agents that don't run JS (most crawler-class agents) see the page.
- Per-agent reachability is inferred from robots access and one shared automated probe except for ChatGPT/Perplexity/Claude, which are run as live purchases. Inferred rows are labeled.
- Automated checks stop at the checkout information page; no purchase is ever completed and no payment fields are entered. CAPTCHA presence is recorded, never solved or bypassed.
