78 / 100

DISCOVERY READINESS SCORE

Agent access (robots.txt)		9.2/10
Structured data (JSON-LD)		12/15
Product feeds (products.json, sitemap)		10/10
llms.txt		0/5

Readiness-only audit: discovery (public-surface) signals. The transaction layer (cart, checkout, live agents) was not tested.

EXECUTIVE SUMMARY

- 1 of 13 agent user-agents are blocked by robots.txt (Bytespider).
- No llms.txt is published — an emerging convention that guides agents through the catalog.
- 8 of 8 sampled product pages have incomplete Product/Offer fields (product missing sku/gtin).

HOW YOU COMPARE

Your discovery-readiness score of **78/100** — the public-surface signals every store exposes (robots, structured data, feeds, llms.txt) — places you in the **bottom 48%** of a cohort of 50 stores (median 85.5). 26 score higher.

Cohort: Top 50 Shopify-powered stores, June 2026. These are large, well-known stores, so a low rank here is a conservative read — the typical store scores lower. Discovery (public-surface) only; transaction-layer and dispute benchmarks are not cohort-derived.

CAN EACH AGENT BUY FROM YOU?

AGENT	DISCOVER	READ PRODUCT	REACH CART	REACH CHECKOUT	LIVE OUTCOME
ChatGPT (OpenAI) INFERRED	yes	yes	—	—	not live-tested
Perplexity INFERRED	yes	yes	—	—	not live-tested
Claude (Anthropic) INFERRED	yes	yes	—	—	not live-tested
Google (Gemini/AI) INFERRED	yes	yes	—	—	not live-tested
Amazon (Rufus) INFERRED	yes	yes	—	—	not live-tested
Apple Intelligence INFERRED	yes	yes	—	—	not live-tested
Meta AI INFERRED	yes	yes	—	—	not live-tested
ByteDance (TikTok) INFERRED	NO	yes	NO	NO	not live-tested

Rows tagged INFERRED were not live-tested (only ChatGPT, Perplexity and Claude are run as live purchases today). Their cart/checkout cells are inferred from robots access and the shared automated probe, not a per-agent purchase attempt. "Discover" = allowed by robots.txt; "Read product" = required structured-data fields present.

DISCOVERY LAYER

12/13 agent user-agents allowed by robots.txt. Blocked: Bytespider (Disallow: /).

FEED	STATUS	NOTES
products.json	pass	products.json accessible
sitemap.xml	pass	sitemap ok, 10 product urls sampled
llms.txt	fail	llms.txt returned 404

PRODUCT PAGE	JSON-LD FIELDS	PROBLEMS
/products/cassie-cashmere-waffle-knit-baby-blanket	4/5	product missing sku/gtin
/products/luxe-sateen-bedding-bundle	4/5	product missing sku/gtin
/products/luxe-australian-sateen-duvet-cover	4/5	product missing sku/gtin
/products/luxe-australian-sateen-pillowcase-set	4/5	product missing sku/gtin
/products/100-mulberry-silk-pillowcase	4/5	product missing sku/gtin
/products/remi-cashmere-throw	4/5	product missing sku/gtin
/products/serene-cotton-towels	4/5	product missing sku/gtin
/products/cashmere-comb	4/5	product missing sku/gtin

WHERE AGENTS DROP OFF

The largest cluster of failures is at **Product page (read details)** — fix #1 below targets this stage.

Discovery (robots / feeds)		1
Product page (read details)		8

- **Discovery (robots / feeds):** 1 agent UAs blocked by robots.txt
- **Product page (read details):** 8 product pages with structured-data gaps

FIX LIST

#	FIX (RANKED BY IMPACT ÷ EFFORT)	IMPACT	EFFORT
1	Allow agent user-agents in robots.txt (1 currently blocked) Blocked agents never see the catalog; one file edit restores discovery for every assistant.	5/5	1/5
2	Server-render complete JSON-LD Product/Offer fields Price, currency, availability and identifiers are what agents quote before visiting — and they must be in the initial HTML, since most crawler-class agents don't run JavaScript.	4/5	2/5
3	Publish an llms.txt index Emerging convention; cheap to add and increasingly read by assistants.	2/5	1/5
4	Unblock the add-to-cart → checkout path The automated probe could not reach checkout; every agent purchase fails at this wall.	5/5	3/5

COPY-PASTE FIXES

robots.txt — unblock 1 agent user-agent

Currently blocked: Bytespider. Add these stanzas to your robots.txt (Shopify: Online Store > themes > edit code > robots.txt.liquid).

```
# Allow AI shopping agents to read your storefront
User-agent: Bytespider
Allow: /

# (keep your existing rules for other crawlers below)
```

JSON-LD Product/Offer — fill the fields agents quote

Serve this in the initial HTML (server-rendered), not injected by JavaScript — most crawler-class agents don't run JS. Affected pages:

/products/cassie-cashmere-waffle-knit-baby-blanket, /products/luxe-sateen-bedding-bundle, /products/luxe-australian-sateen-duvet-cover, /products/luxe-australian-sateen-pillowcase-set, /products/100-mulberry-silk-pillowcase, /products/remi-cashmere-throw (+2 more).

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@type": "Product",
  "name": "<product title>",
  "image": ["https://italic.com/<product-image>.jpg"],
  "sku": "<your SKU or GTIN>",
  "brand": { "@type": "Brand", "name": "Italic" },
  "offers": {
    "@type": "Offer",
    "price": "<numeric price, no currency symbol>",
    "priceCurrency": "USD",
    "availability": "https://schema.org/InStock",
    "url": "https://italic.com/products/<handle>"
  }
}
</script>
```

llms.txt — a guided index for AI agents

Serve this at <https://italic.com/llms.txt>. Emerging convention; cheap to add and increasingly read by assistants.

```

```

METHODOLOGY & CAVEATS

- This is a **readiness-only** audit: it measures the public storefront (robots, feeds, structured data, checkout reachability). Order classification and dispute exposure require the merchant's order data and are not included here.
- Discovery checks read the **initial HTML response** and do not execute JavaScript. Structured data injected client-side will read as missing here — which is also how agents that don't run JS (most crawler-class agents) see the page.
- Per-agent reachability is inferred from robots access and one shared automated probe except for ChatGPT/Perplexity/Claude, which are run as live purchases. Inferred rows are labeled.
- Automated checks stop at the checkout information page; no purchase is ever completed and no payment fields are entered. CAPTCHA presence is recorded, never solved or bypassed.
