ruggable.com · GMV band n/a (readiness-only) · 2026-06-12

**38** / 100

DISCOVERY READINESS SCORE

|                                        |                        |       |
|----------------------------------------|------------------------|-------|
| Agent access (robots.txt)              | <div><div></div></div> | 10/10 |
| Structured data (JSON-LD)              | <div><div></div></div> | 0/15  |
| Product feeds (products.json, sitemap) | <div><div></div></div> | 5/10  |
| llms.txt                               | <div><div></div></div> | 0/5   |

Readiness-only audit: discovery (public-surface) signals. The transaction layer (cart, checkout, live agents) was not tested.

## EXECUTIVE SUMMARY

- All 13 agent user-agents are allowed by robots.txt.
- The /products.json catalog feed is disabled or inaccessible to agents.
- No llms.txt is published — an emerging convention that guides agents through the catalog.
- 8 of 8 sampled product pages expose no server-rendered Product structured data — agents that don't execute JavaScript (most crawler-class agents) can't read price, availability, or SKU.

## HOW YOU COMPARE

Your discovery-readiness score of **38/100** — the public-surface signals every store exposes (robots, structured data, feeds, llms.txt) — places you in the **bottom 6%** of a cohort of 50 stores (median 85.5). 47 score higher.

Cohort: Top 50 Shopify-powered stores, June 2026. These are large, well-known stores, so a low rank here is a conservative read — the typical store scores lower. Discovery (public-surface) only; transaction-layer and dispute benchmarks are not cohort-derived.

CAN EACH AGENT BUY FROM YOU?

| AGENT              |          | DISCOVER | READ PRODUCT | REACH CART | REACH CHECKOUT | LIVE OUTCOME    |
|--------------------|----------|----------|--------------|------------|----------------|-----------------|
| ChatGPT (OpenAI)   | INFERRED | yes      | partial      | —          | —              | not live-tested |
| Perplexity         | INFERRED | yes      | partial      | —          | —              | not live-tested |
| Claude (Anthropic) | INFERRED | yes      | partial      | —          | —              | not live-tested |
| Google (Gemini/AI) | INFERRED | yes      | partial      | —          | —              | not live-tested |
| Amazon (Rufus)     | INFERRED | yes      | partial      | —          | —              | not live-tested |
| Apple Intelligence | INFERRED | yes      | partial      | —          | —              | not live-tested |
| Meta AI            | INFERRED | yes      | partial      | —          | —              | not live-tested |
| ByteDance (TikTok) | INFERRED | yes      | partial      | —          | —              | not live-tested |

Rows tagged **INFERRED** were not live-tested (only ChatGPT, Perplexity and Claude are run as live purchases today). Their cart/checkout cells are inferred from robots access and the shared automated probe, not a per-agent purchase attempt. "Discover" = allowed by robots.txt; "Read product" = required structured-data fields present.

DISCOVERY LAYER

13/13 agent user-agents allowed by robots.txt.

| FEED          | STATUS | NOTES                               |
|---------------|--------|-------------------------------------|
| products.json | fail   | products.json returned 404          |
| sitemap.xml   | pass   | sitemap ok, 10 product urls sampled |
| llms.txt      | fail   | llms.txt returned 404               |

| PRODUCT PAGE                          | JSON-LD FIELDS      | PROBLEMS                                                      |
|---------------------------------------|---------------------|---------------------------------------------------------------|
| /products/standard-rug-pad            | not server-rendered | no server-rendered Product schema (JavaScript-only or absent) |
| /products/vintage-daisy-bordered-blue | not server-rendered | no server-rendered Product schema (JavaScript-only or absent) |
| /products/vintage-daisy-bordered-grey | not server-rendered | no server-rendered Product schema (JavaScript-only or absent) |
| /products/cambria-ruby                | not server-rendered | no server-rendered Product schema (JavaScript-only or absent) |
| /products/cambria-sapphire            | not server-rendered | no server-rendered Product schema (JavaScript-only or absent) |
| /products/dot-border-pink             | not server-rendered | no server-rendered Product schema (JavaScript-only or absent) |
| /products/multi-stripe-blue           | not server-rendered | no server-rendered Product schema (JavaScript-only or absent) |
| /products/multi-stripe-polychrome     | not server-rendered | no server-rendered Product schema (JavaScript-only or absent) |

WHERE AGENTS DROP OFF

The largest cluster of failures is at **Product page (read details)** — fix #1 below targets this stage.

- **Product page (read details):** 8 product pages with structured-data gaps

FIX LIST

| # | FIX (RANKED BY IMPACT ÷ EFFORT)                                                                                                                                                                                                                 | IMPACT | EFFORT |
|---|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|--------|
| 1 | <b>Re-enable the /products.json feed</b><br>The simplest structured catalog surface agents can read.                                                                                                                                            | 3/5    | 1/5    |
| 2 | <b>Server-render complete JSON-LD Product/Offer fields</b><br>Price, currency, availability and identifiers are what agents quote before visiting — and they must be in the initial HTML, since most crawler-class agents don't run JavaScript. | 4/5    | 2/5    |
| 3 | <b>Publish an llms.txt index</b><br>Emerging convention; cheap to add and increasingly read by assistants.                                                                                                                                      | 2/5    | 1/5    |
| 4 | <b>Unblock the add-to-cart → checkout path</b><br>The automated probe could not reach checkout; every agent purchase fails at this wall.                                                                                                        | 5/5    | 3/5    |

## COPY-PASTE FIXES

### JSON-LD Product/Offer — fill the fields agents quote

Serve this in the initial HTML (server-rendered), not injected by JavaScript — most crawler-class agents don't run JS. Affected pages: /products/standard-rug-pad, /products/vintage-daisy-bordered-blue, /products/vintage-daisy-bordered-grey, /products/cambria-ruby, /products/cambria-sapphire, /products/dot-border-pink (+2 more).

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@type": "Product",
  "name": "<product title>",
  "image": ["https://ruggable.com/<product-image>.jpg"],
  "sku": "<your SKU or GTIN>",
  "brand": { "@type": "Brand", "name": "Ruggable" },
  "offers": {
    "@type": "Offer",
    "price": "<numeric price, no currency symbol>",
    "priceCurrency": "USD",
    "availability": "https://schema.org/InStock",
    "url": "https://ruggable.com/products/<handle>"
  }
}
</script>
```

### llms.txt — a guided index for AI agents

Serve this at <https://ruggable.com/llms.txt>. Emerging convention; cheap to add and increasingly read by assistants.

## METHODOLOGY & CAVEATS

- This is a **readiness-only** audit: it measures the public storefront (robots, feeds, structured data, checkout reachability). Order classification and dispute exposure require the merchant's order data and are not included here.
- Discovery checks read the **initial HTML response** and do not execute JavaScript. Structured data injected client-side will read as missing here — which is also how agents that don't run JS (most crawler-class agents) see the page.
- Per-agent reachability is inferred from robots access and one shared automated probe except for ChatGPT/Perplexity/Claude, which are run as live purchases. Inferred rows are labeled.
- Automated checks stop at the checkout information page; no purchase is ever completed and no payment fields are entered. CAPTCHA presence is recorded, never solved or bypassed.
