 / 100

DISCOVERY READINESS SCORE

Agent access (robots.txt)		10/10
Structured data (JSON-LD)		12/15
Product feeds (products.json, sitemap)		10/10
llms.txt		5/5

Readiness-only audit: discovery (public-surface) signals. The transaction layer (cart, checkout, live agents) was not tested.

EXECUTIVE SUMMARY

- All 13 agent user-agents are allowed by robots.txt.
- 6 of 6 sampled product pages have incomplete Product/Offer fields (product missing sku/gtin; missing og:title).

HOW YOU COMPARE

Your discovery-readiness score of **93/100** — the public-surface signals every store exposes (robots, structured data, feeds, llms.txt) — places you in the **top 38%** of a cohort of 50 stores (median 85.5). 19 score higher.

Cohort: Top 50 Shopify-powered stores, June 2026. These are large, well-known stores, so a low rank here is a conservative read — the typical store scores lower. Discovery (public-surface) only; transaction-layer and dispute benchmarks are not cohort-derived.

CAN EACH AGENT BUY FROM YOU?

AGENT	DISCOVER	READ PRODUCT	REACH CART	REACH CHECKOUT	LIVE OUTCOME
ChatGPT (OpenAI) INFERRED	yes	yes	—	—	not live-tested
Perplexity INFERRED	yes	yes	—	—	not live-tested
Claude (Anthropic)	yes	yes	yes	yes	completed
Google (Gemini/AI) INFERRED	yes	yes	—	—	not live-tested
Amazon (Rufus) INFERRED	yes	yes	—	—	not live-tested
Apple Intelligence INFERRED	yes	yes	—	—	not live-tested
Meta AI INFERRED	yes	yes	—	—	not live-tested
ByteDance (TikTok) INFERRED	yes	yes	—	—	not live-tested

Rows tagged INFERRED were not live-tested (only ChatGPT, Perplexity and Claude are run as live purchases today). Their cart/checkout cells are inferred from robots access and the shared automated probe, not a per-agent purchase attempt. "Discover" = allowed by robots.txt; "Read product" = required structured-data fields present.

DISCOVERY LAYER

13/13 agent user-agents allowed by robots.txt.

FEED	STATUS	NOTES
products.json	pass	products.json accessible
sitemap.xml	pass	sitemap ok, 10 product urls sampled
llms.txt	pass	llms.txt present

PRODUCT PAGE	JSON-LD FIELDS	PROBLEMS
/products/sizzle	4/5	product missing sku/gtin; missing og:title
/products/drizzle	4/5	product missing sku/gtin; missing og:title
/products/sizzle-drizzle-combo-pack	4/5	product missing sku/gtin; missing og:title
/products/drizzle-5l-case-of-3	4/5	product missing sku/gtin; missing og:title
/products/sizzle-5l-case-of-3	4/5	product missing sku/gtin; missing og:title
/products/gift-set-drizzle-sizzle	4/5	product missing sku/gtin; missing og:title

TRANSACTION LAYER

AGENT	STAGE REACHED	BLOCKER / NOTES
Claude	completed (stopped pre-payment)	Live assisted browser session driven via Claude in Chrome on 2026-06-13 (a real agent-style run, not the consumer Claude shopping feature). Reached the checkout information page in real time. Two findings worth noting on the readout: (1) there is NO CAPTCHA on the product/checkout path — the automated readiness probe's captcha flag was a false positive triggered by a site-wide reCAPTCHA script used for forms; (2) the only real friction was an SMS/email popup interstitial whose close control was hard to reach — a likely drop-off point for less-persistent agents.

WHERE AGENTS DROP OFF

The largest cluster of failures is at **Product page (read details)** — fix #1 below targets this stage.

- **Product page (read details):** 6 product pages with structured-data gaps

FIX LIST

#	FIX (RANKED BY IMPACT ÷ EFFORT)	IMPACT	EFFORT
1	Server-render complete JSON-LD Product/Offer fields Price, currency, availability and identifiers are what agents quote before visiting — and they must be in the initial HTML, since most crawler-class agents don't run JavaScript.	4/5	2/5
2	Add canonical and OpenGraph tags to product pages Cheap wins for deduplication and previews in assistant answers.	2/5	1/5
3	Unblock the add-to-cart → checkout path The automated probe could not reach checkout; every agent purchase fails at this wall.	5/5	3/5

COPY-PASTE FIXES

JSON-LD Product/Offer — fill the fields agents quote

Serve this in the initial HTML (server-rendered), not injected by JavaScript — most crawler-class agents don't run JS. Affected pages: /products/sizzle, /products/drizzle, /products/sizzle-drizzle-combo-pack, /products/drizzle-5l-case-of-3, /products/sizzle-5l-case-of-3, /products/gift-set-drizzle-sizzle.

```

METHODOLOGY & CAVEATS

- This is a **readiness-only** audit: it measures the public storefront (robots, feeds, structured data, checkout reachability). Order classification and dispute exposure require the merchant's order data and are not included here.
- Discovery checks read the **initial HTML response** and do not execute JavaScript. Structured data injected client-side will read as missing here — which is also how agents that don't run JS (most crawler-class agents) see the page.
- Per-agent reachability is inferred from robots access and one shared automated probe except for ChatGPT/Perplexity/Claude, which are run as live purchases. Inferred rows are labeled.
- Automated checks stop at the checkout information page; no purchase is ever completed and no payment fields are entered. CAPTCHA presence is recorded, never solved or bypassed.
