 / 100

DISCOVERY READINESS SCORE

Agent access (robots.txt)		10/10
Structured data (JSON-LD)		15/15
Product feeds (products.json, sitemap)		5/10
llms.txt		0/5

Readiness-only audit: discovery (public-surface) signals. The transaction layer (cart, checkout, live agents) was not tested.

EXECUTIVE SUMMARY

- All 13 agent user-agents are allowed by robots.txt.
- The /products.json catalog feed is disabled or inaccessible to agents.
- No llms.txt is published — an emerging convention that guides agents through the catalog.
- 6 of 6 sampled product pages have structured-data gaps (missing og:image; 1 unparseable ld+json block(s)).

HOW YOU COMPARE

Your discovery-readiness score of **75/100** — the public-surface signals every store exposes (robots, structured data, feeds, llms.txt) — places you in the **bottom 46%** of a cohort of 50 stores (median 85.5). 27 score higher.

Cohort: Top 50 Shopify-powered stores, June 2026. These are large, well-known stores, so a low rank here is a conservative read — the typical store scores lower. Discovery (public-surface) only; transaction-layer and dispute benchmarks are not cohort-derived.

CAN EACH AGENT BUY FROM YOU?

AGENT	DISCOVER	READ PRODUCT	REACH CART	REACH CHECKOUT	LIVE OUTCOME
ChatGPT (OpenAI) INFERRED	yes	yes	—	—	not live-tested
Perplexity INFERRED	yes	yes	—	—	not live-tested
Claude (Anthropic) INFERRED	yes	yes	—	—	not live-tested
Google (Gemini/AI) INFERRED	yes	yes	—	—	not live-tested
Amazon (Rufus) INFERRED	yes	yes	—	—	not live-tested
Apple Intelligence INFERRED	yes	yes	—	—	not live-tested
Meta AI INFERRED	yes	yes	—	—	not live-tested
ByteDance (TikTok) INFERRED	yes	yes	—	—	not live-tested

Rows tagged INFERRED were not live-tested (only ChatGPT, Perplexity and Claude are run as live purchases today). Their cart/checkout cells are inferred from robots access and the shared automated probe, not a per-agent purchase attempt. "Discover" = allowed by robots.txt; "Read product" = required structured-data fields present.

DISCOVERY LAYER

13/13 agent user-agents allowed by robots.txt.

FEED	STATUS	NOTES
products.json	fail	products.json returned 200 but no products array (likely disabled or html)
sitemap.xml	pass	sitemap ok, 10 product urls sampled
llms.txt	fail	llms.txt returned 404

PRODUCT PAGE	JSON-LD FIELDS	PROBLEMS
/products/medium-roast-coffee-blend	5/5	missing og:image
/products/light-roast-coffee-blend	5/5	missing og:image
/products/medium-roast-cold-brew-singles	5/5	missing og:image
/products/chamberlain-coffee-black-stainless-steel-straws	5/5	missing og:image
/products/espresso-dark-roast-coffee-blend	5/5	1 unparseable ld+json block(s); missing og:image
/products/chamberlain-coffee-cold-brew-coffee-starter-pack	5/5	missing og:image

WHERE AGENTS DROP OFF

The largest cluster of failures is at **Product page (read details)** — fix #1 below targets this stage.

Product page (read details) 6

6

- **Product page (read details):** 6 product pages with structured-data gaps

FIX LIST

#	FIX (RANKED BY IMPACT ÷ EFFORT)	IMPACT	EFFORT
1	Re-enable the /products.json feed The simplest structured catalog surface agents can read.	3/5	1/5
2	Complete JSON-LD Product/Offer fields on product pages Price, currency, availability and identifiers are what agents quote and compare before visiting.	4/5	2/5
3	Add canonical and OpenGraph tags to product pages Cheap wins for deduplication and previews in assistant answers.	2/5	1/5
4	Publish an llms.txt index Emerging convention; cheap to add and increasingly read by assistants.	2/5	1/5
5	Unblock the add-to-cart → checkout path The automated probe could not reach checkout; every agent purchase fails at this wall.	5/5	3/5

COPY-PASTE FIXES

JSON-LD Product/Offer — fill the fields agents quote

Affected pages: /products/medium-roast-coffee-blend, /products/light-roast-coffee-blend, /products/medium-roast-cold-brew-singles, /products/chamberlain-coffee-black-stainless-steel-straws, /products/espresso-dark-roast-coffee-blend, /products/chamberlain-coffee-cold-brew-coffee-starter-pack. Missing fields seen: missing og:image; 1 unparseable ld+json block(s).

METHODOLOGY & CAVEATS

- This is a **readiness-only** audit: it measures the public storefront (robots, feeds, structured data, checkout reachability). Order classification and dispute exposure require the merchant's order data and are not included here.
- Discovery checks read the **initial HTML response** and do not execute JavaScript. Structured data injected client-side will read as missing here — which is also how agents that don't run JS (most crawler-class agents) see the page.
- Per-agent reachability is inferred from robots access and one shared automated probe except for ChatGPT/Perplexity/Claude, which are run as live purchases. Inferred rows are labeled.
- Automated checks stop at the checkout information page; no purchase is ever completed and no payment fields are entered. CAPTCHA presence is recorded, never solved or bypassed.
