

Beardbrand

98 / 100

beardbrand.com · GMV band n/a (readiness-only) · 2026-06-12

DISCOVERY READINESS SCORE

Agent access (robots.txt)		9.2/10
Structured data (JSON-LD)		15/15
Product feeds (products.json, sitemap)		10/10
llms.txt		5/5

Readiness-only audit: discovery (public-surface) signals. The transaction layer (cart, checkout, live agents) was not tested.

EXECUTIVE SUMMARY

- 1 of 13 agent user-agents are blocked by robots.txt (Amazonbot).

HOW YOU COMPARE

Your discovery-readiness score of **98/100** — the public-surface signals every store exposes (robots, structured data, feeds, llms.txt) — places you in the **top 34%** of a cohort of 50 stores (median 85.5). 17 score higher.

Cohort: Top 50 Shopify-powered stores, June 2026. These are large, well-known stores, so a low rank here is a conservative read — the typical store scores lower. Discovery (public-surface) only; transaction-layer and dispute benchmarks are not cohort-derived.

CAN EACH AGENT BUY FROM YOU?

AGENT		DISCOVER	READ PRODUCT	REACH CART	REACH CHECKOUT	LIVE OUTCOME
ChatGPT (OpenAI)	INFERRED	yes	yes	—	—	not live-tested
Perplexity	INFERRED	yes	yes	—	—	not live-tested
Claude (Anthropic)	INFERRED	yes	yes	—	—	not live-tested
Google (Gemini/AI)	INFERRED	yes	yes	—	—	not live-tested
Amazon (Rufus)	INFERRED	NO	yes	NO	NO	not live-tested
Apple Intelligence	INFERRED	yes	yes	—	—	not live-tested
Meta AI	INFERRED	yes	yes	—	—	not live-tested
ByteDance (TikTok)	INFERRED	yes	yes	—	—	not live-tested

Rows tagged INFERRED were not live-tested (only ChatGPT, Perplexity and Claude are run as live purchases today). Their cart/checkout cells are inferred from robots access and the shared automated probe, not a per-agent purchase attempt. "Discover" = allowed by robots.txt; "Read product" = required structured-data fields present.

DISCOVERY LAYER

12/13 agent user-agents allowed by robots.txt. Blocked: Amazonbot (Disallow: /).

FEED	STATUS	NOTES
products.json	pass	products.json accessible
sitemap.xml	pass	sitemap ok, 10 product urls sampled
llms.txt	pass	llms.txt present

PRODUCT PAGE	JSON-LD FIELDS	PROBLEMS
/products/alliance-membership	5/5	clean
/products/beard-combs	5/5	clean
/products/beard-brush	5/5	clean
/products/trimming-scissors	5/5	clean
/products/book-of-reminders	5/5	clean
/products/tweezers	5/5	clean
/products/utility-beard-trimmer	5/5	clean
/products/bold-fortune-mens-cologne	5/5	clean

WHERE AGENTS DROP OFF

The largest cluster of failures is at **Discovery (robots / feeds)** — fix #1 below targets this stage.

Discovery (robots / feeds)

1

- Discovery (robots / feeds):** 1 agent UAs blocked by robots.txt

FIX LIST

#	FIX (RANKED BY IMPACT ÷ EFFORT)	IMPACT	EFFORT
1	Allow agent user-agents in robots.txt (1 currently blocked) Blocked agents never see the catalog; one file edit restores discovery for every assistant.	5/5	1/5
2	Unblock the add-to-cart → checkout path The automated probe could not reach checkout; every agent purchase fails at this wall.	5/5	3/5

COPY-PASTE FIXES

robots.txt — unblock 1 agent user-agent

Currently blocked: Amazonbot. Add these stanzas to your robots.txt (Shopify: Online Store > themes > edit code > robots.txt.liquid).

```
# Allow AI shopping agents to read your storefront
User-agent: Amazonbot
Allow: /

# (keep your existing rules for other crawlers below)
```

METHODOLOGY & CAVEATS

- This is a **readiness-only** audit: it measures the public storefront (robots, feeds, structured data, checkout reachability). Order classification and dispute exposure require the merchant's order data and are not included here.
- Discovery checks read the **initial HTML response** and do not execute JavaScript. Structured data injected client-side will read as missing here — which is also how agents that don't run JS (most crawler-class agents) see the page.
- Per-agent reachability is inferred from robots access and one shared automated probe except for ChatGPT/Perplexity/Claude, which are run as live purchases. Inferred rows are labeled.
- Automated checks stop at the checkout information page; no purchase is ever completed and no payment fields are entered. CAPTCHA presence is recorded, never solved or bypassed.
